1. Claims 1-27 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art, either singly or in combination fails to anticipate or render obvious, the limitations of:
 - ...forming a first photoresist mask layer over the low voltage transistors;
 - doping the drains of the core and the input/output transistors, wherein the doping is a medium doping;
 - forming a second photoresist mask layer over the input/output transistors; and
 - doping the drains of the core and the low voltage threshold transistors, wherein the doping is a medium doping, as required by claim 1.The prior art, either singly or in combination fails to anticipate or render obvious, the limitations of:
 - ...forming a first photoresist mask layer over the low voltage and the input/output transistors;
 - doping the drains of the core transistors, wherein the doping is a medium doping;
 - forming a spacing layer over the core, low voltage and input/output transistors;
 - forming a second photoresist mask layer over the input/output transistors;
 - doping the drains of the core and the low voltage threshold transistors, wherein the doping is a medium doping;
 - forming a third photoresist mask layer over the core and the low voltage transistors; and

doping the drains of the input/output transistors, wherein the doping is a medium doping, as required by claim 10.

Lastly the prior art, either singly or in combination fails to anticipate or render obvious, the limitations of:

...forming a photoresist mask layer over the low voltage transistors and the IO transistors;

doping the drains of the core transistors, wherein the doping is a medium doping;
removing the photoresist mask layer; and

doping the drains of the core, the low voltage threshold, and the IO transistors, wherein the doping is a medium doping, as required by claim 19.
